

SCM 2018 and PLM 2018 is a one-of-a-kind SCM-focused educational event, bringing together top technologists from SAP, independent consulting firms, and leading global organizations under one roof to help you develop operational efficiency, optimal planning, execution of your supply chain, and will help you bridge the gap to your digital supply chain. Join us this year for a dynamic educational and networking experience.

IN-DEPTH CONTENT

New sessions covering the hottest topics, including:

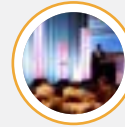

- » Optimal supply chain performance – Leveraging the latest SAP innovations including the SAP Leonardo portfolio, SAP S/4HANA, SAP Integrated Business Planning, SAP Product Lifecycle Management, SAP Transportation Management, and more
- » Numerous tips and tricks to seamlessly implement and integrate your new and existing SAP solutions, along with strategies to transform your supply chain for the digital age
- » The latest insights on emerging technologies including SAP Leonardo, AI, IoT, digital twin, and blockchain to drive transformation and tackle common issues in supply chain management, logistics, and PLM

NEW TRACK: EMERGING TECHNOLOGIES

Sessions on utilizing SAP Leonardo, AI, IoT, blockchain, and the digital twin such as:

- » Understanding blockchain including the fundamental concepts of the distributed ledger, relevant blockchain terminology, track and trace, and real-world blockchain use cases
- » Methods to achieve greater transparency, simplified processes, and partner collaboration by leveraging SAP S/4HANA with various SAP solutions and business processes including SAP Product Lifecycle Management and SAP Fiori®
- » Understanding how SAP Leonardo can be used to optimize the entire logistics value chain, including warehousing automation and freight management
- » Tips to utilize and capture real-time data from smart products and external product networks to strengthen decision making

NEW TRACK: SAP INTEGRATED BUSINESS PLANNING

Attend to get:

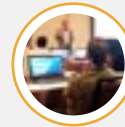

- » A clear understanding of the differences between SAP Integrated Business Planning and SAP Advanced Planning and Optimization
- » Road maps, tips, and use cases to successfully implement SAP Integrated Business Planning
- » Proven strategies to boost your supply chain performance and reduce inventory with real-time integrated reporting and dashboarding capabilities

PRODUCT ROAD MAP SESSIONS FROM SAP

Walk through sessions showcasing SAP product innovations and road maps, such as:

- » Sunsetting of SAP Advanced Planning and Optimization: Which functionality is moving to SAP Integrated Business Planning and which functionality is moving to SAP S/4HANA
- » New features and capabilities for production planning and detailed scheduling, SAP S/4HANA, SAP Integrated Business Planning for response and supply management, and SAP Supply Chain Control Tower
- » Details on the technology strategy and road map for SAP PLM, including insight into future investment areas and planned enhancements
- » How to build your SAP digital supply chain and road map

2 NEW PRE-CONFERENCE WORKSHOPS

Jump-start your conference education on the morning of the event and tap into these special 3-hour sessions:

- » Bring Your Own Device Workshop: SAP Integrated Business Planning: The next generation of the supply chain planning suite
- » From things to outcomes: Understanding the SAP Leonardo portfolio of solutions and what it means for your IoT and digital transformation strategy
