

Basis & SAP Administration 2019 is a one-of-a-kind educational event, bringing together top experts from SAP, independent consulting firms, and leading global organizations under one roof to provide you with up-to-date skills and strategies to run your SAP systems efficiently, effectively, and securely.

### BRAND NEW CONTENT

30+ new sessions covering the hottest topics, including:

- » A deep dive into the latest SAP Solution Manager updates and best practices for leveraging the newest functionality in your organization
- » Detecting security breaches early on – identify real attacks as they happen
- » How to manage, integrate, and optimize applications in a hybrid cloud
- » Hands-on lab: A step-by-step guide to optimize and simplify SAP HANA® security

### EXCLUSIVE TAKE-HOME MATERIALS

Get copies of every session, plus tips, tricks, and recommendations to help you throughout the year. Walk away with useful resources, including:

- » A landscape plan, sample impact/test plan, and sample swim lane diagram to kickstart a new upgrade strategy in your organization
- » A guide to refining system monitoring alerts to meet your system requirements
- » Documentation outlining the best practices for upgrading to SAP Solution Manager 7.2
- » A list of links to helpful resources, screenshots, and demos of SAP Solution Manager CharRM testing tools
- » A sample project plan for cloud migration that includes expected durations for system builds and testing cycles

### PRODUCT FUNCTIONALITY AND ROAD MAP SESSIONS FROM SAP

Sessions showcasing SAP product innovations and road maps, such as:

- » Trust matters! The SAP security strategy and road map
- » An introduction to Focused Run for SAP Solution Manager
- » Explore what's new and road map plans for SAP Solution Manager
